

CBMT Digital Credential

Put Your CBMT Digital Credential to Work for You

Learning, employment, and advancement opportunities are intertwined, but a career path rarely follows a straight line. CBMT wants to recognize your learning achievements and skills in a way that connects you with opportunities that can serve as milestones along your career path. That's why we issue digital credentials through Credly's Acclaim platform.

What Is a Digital Credential?

Digital credentials go beyond paper certificates. They are portable, verifiable, and uniquely linked to you. They also ensure that your hard-earned achievements are owned by you, not us - you can access and utilize your digital credential whenever, however you see fit. Digital credentials make you - and your achievements - more visible to employers and your professional network.

Share Your Achievements with Your Network

Your skills, competencies, and certifications are worth more than a static bullet point on a resume or a paper certificate hanging on the wall in your office. When represented as a digital credential, you can share your achievements with your network in one click from Credly's Acclaim platform. Peers and employers can verify and learn more about what it is you can do thanks to earning a digital credential from CBMT. And research shows that professionals who share their digital credentials to professional networking sites are discovered by employers, on average, six times more often than those who do not.

Find Your Next Career Opportunity

You've invested time and money into advancing your skills, and your CBMT digital credential can unlock career opportunities for you. Credly's labor market insights help you:

- discover new skills that complement what you already know
- connect with the next certification along your career path
- search and apply for your next job opportunity

"After getting certified and adding the badge to my LinkedIn profile, two CEOs from local companies got in touch with me to work with them on a project." Saint-Paul Tinga, Oracle Certified Associate
